

GH3 Rejuv Crème

Introduction & Overview Manufactured by NuCell, GH3 Rejuv Crème is available for online sale. It is promoted as an anti-inflammatory, antioxidant formula that works to reduce wrinkles and fine lines, while preventing signs of aging.

It is important for people to be educated about the active ingredients contained in the products in which they invest. There are thousands of ineffective or potentially dangerous products on the market, so choosing the right one is crucial to a person's health and satisfaction.

GH3 Rejuv is an Advanced Anti-aging Skin Formula!

More than a moisturizer, GH3-Rejuv Crème is food for your skin, nourishing and rejuvenating. Formulated for all skin types over thirty, GH3-Rejuv Crème feeds, protects, hydrates and firms the skin.

GH3 Rejuv crème absorbs deep into the dermis, where much aging begins. This high quality, natural moisturizer is designed to solve problems, not mask them. GH3-Rejuv Crème contains no harsh chemicals, synthetics, or oxidizing oils.

The high concentrations of chirally correct vital nutrients, natural moisturizers and cell rejuvenators contained in GH3-Rejuv Crème are unparalleled. Using a liposome-like penetration, the lipid and water soluble nutrients are deeply absorbed into the skin. The results are clear.

- GH3-Rejuv Crème:
- Protects and hydrates
- Diminishes appearance of fine lines
- Restores elasticity
- Reduces capillary fragility
- Promotes firm skin
- Reduces oxidation alterations
- Smoothes, moisturizes and softens
- Minimizes signs of premature aging
-
- NuCell® products DO NOT contain sodium laurel sulfate, parabens, propylene glycol nor any other harsh synthetics!
