

MINERALS

Bone-Builder:

A wonderful blend of calcium (from calcium carbonate, citrate, phosphate and lactate), magnesium, vitamin D3, vitamin K1, vitamin C, silicon, boron and betaine hydrochloride. Daily Bone-Builder is available in bottles of 120 capsules.

Cal II:

A very alkaline calcium supplement utilizing a natural source of calcium carbonate and calcium hydroxide with brewers yeast for added assimilation. Six capsules provide 1000 mg of elemental calcium. This product is also available in a yeast free form that is exactly the same, except that there is no brewer's yeast. Daily Cal II is available in bottles of 100 and 250 capsules. (Brewer's Yeast, RB, SD)

Cal II Supreme:

Daily CAL II Supreme is a highly alkalizing mineral supplement made from premium quality coral calcium from Okinawa, Japan and natural calcium hydroxide from earth deposits in the USA. Although primarily a calcium supplement, CAL-II Supreme contains small amounts of numerous naturally occurring trace elements and 1 mg each of cesium and rubidium. CAL-II Supreme has been carefully formulated to provide powerful ionic alkaline support by supplying highly active mineral derived anions.

Caution: Contains powerful alkaline minerals: never chew capsules and take with at least 8 oz of water. Daily Cal II Supreme is available in bottles of 100 and 250 capsules. (MS, SD)

Calcium Aspartate:

Daily Calcium Aspartate is a calcium salt of the amino acid, aspartic acid, that has a neutral reaction in the body. Medical research has shown it to be a well absorbed form of calcium supplementation supplying 100 mg of elemental calcium. Calcium aspartate and citrate are best for people who are uncertain of the acid-base balance of their bodies. This is a great source of calcium for everyone. Daily Calcium Aspartate is available in bottles of 150 capsules. (MS, SD)

Calcium Citrate:

Daily Calcium Citrate is another form of calcium that has a neutral reaction in the body. Calcium citrate is a neutral salt of citric acid, an intermediate in the "Krebs Cycle". This product is also a form of calcium that works well for everyone. There is 100 mg of elemental calcium per capsule. Daily Calcium Citrate is available in bottles of 150 capsules. (MS, SD)

Calcium Gluconate:

Calcium Gluconate is a neutral, easily assimilated form of calcium. This is a calcium salt of gluconic acid made from calcium carbonate and gluconic acid from beets. There is 40 mg of elemental calcium per capsule. Daily Calcium Gluconate is available in bottles of 100 and 250 capsules. (MS, SD)

Calcium Lactate:

This milk type calcium is from a non-dairy source. It is naturally produced by fermentation of calcium carbonate with sugars and starches from potatoes. Calcium lactate is a more acid reacting form of calcium providing 192 mg of elemental calcium per 6 capsules. Daily Calcium Lactate is available in bottles of 100 and 250 capsules. (MS, SD)

Chromium Picolinate:

There are a number of chromium supplements on the market including GTF chromium, chromium polynicotinate, and others. All of the better chromium supplements, including chromium picolinate, are in a tri-valent chemical state. Chromium picolinate has the advantage of being hypoallergenic since there is no yeast. Furthermore, most of the chromium research has used the picolinate form of chromium. Chromium picolinate is the best researched and most reliable form available. Each capsule contains 200 mcgs of chromium from chromium picolinate. Daily Chromium Picolinate is available in bottles of 100 capsules. (MS, RB)CAUTION: Because chromium can increase insulin sensitivity, this may alter insulin requirements in diabetics. There is some evidence that persons with reactive hypoglycemia may also need to use caution with chromium. This applies to all forms of chromium, not just chromium picolinate. For this reason we need to include the following warning - Diabetics/Hypoglycemics: Use only under a physician's supervision.

Colloidal Silver:

This colloidal silver suspension, at 20 ppm, is the ideal concentration providing optimal bactericidal and viracidal activity. Daily Colloidal Silver is available in 4, 8 or 32 oz bottles. (NE)

Coral Calcium:

Daily Coral Calcium is the highest quality Sango coral from Okinawa, Japan. Daily Coral calcium is taken from land deposits of ancient coral, thereby assuring that coral reefs in the ocean are not disturbed. Coral calcium from land deposits are free of pollutants that were introduced by man into the Pacific Ocean, because the coral was formed long before modern man was there. All Daily coral products are mined and processed by strict Japanese pharmaceutical standards and further processed and packaged under strict American standards at Daily Manufacturing's FDA inspected facility. Daily Coral calcium is ground extremely fine (7-10 micron); assuring that all of the calcium easily forms a colloidal suspension and is easily absorbed. Daily Coral Calcium is available in bottles of 90 capsules or 8 oz. containers.

Coral Calcium, Magnesium & Vitamin D3:

Coral Calcium plus magnesium and vitamin D3 in one capsule! This coral calcium combination contains 500 mg calcium (calcium carbonate) from Okinawa, Japan, 250 mg magnesium (carbonate) and 200 IU of vitamin D3 per three capsules. Daily Coral Calcium-Magnesium-Vitamin D3 is available in bottles of 120 capsules or 5 oz. containers.

Dolomite:

Each capsule contains 144 mg of calcium and 68 mg of magnesium from dolomitic lime. This dolomite has been assayed for lead to assure that only very small trace amounts are present, posing no health hazard. Daily Dolomite is available in bottles of 100 and 250 tablets. (NE)

Ferro-Tonic:

Ferro-Tonic is an iron supplement in easy to assimilate liquid form. Eight drops contain 10.4 mg of elemental iron from a naturally occurring mined ferrous sulfate. Daily Ferro-Tonic is available in a 2 oz dropper tip bottle. (Distilled Water)

K-Min:

K-Min is a blend of Min-Col (302 mg) and diatomaceous earth (118 mg), supplying 78 mg of elemental calcium as calcium phosphate per capsule. This product is not for use by pregnant women or animals. Daily K-Min is available in bottles of 100 and 250 capsules. (NE)

Lime Water:

A saturated calcium solution made with water from a specific well with a special sulfur compound to make the calcium more available. Daily Lime Water is available in 12 oz and 32 oz containers. (NE)

Liqui-Min:

We use mineral water from T.J. Clark in Utah. This source of ionized and colloidal liquid minerals is the original colloidal mineral water using lignite, which is derived from ancient vegetation (in between peat moss and coal). Water is slowly dripped through the lignite allowing it to accumulate the rich natural blend of easily assimilated trace elements. This is an excellent, rare, hard-to-find source of trace elements. Daily Liqui-Min is available in 32 oz. bottles. (NE)

Magnesium Aspartate:

Magnesium aspartate is a magnesium salt of the amino acid, aspartic acid, that has a neutral reaction in the body and that medical research has shown to be a well absorbed form of magnesium supplementation. Each capsule supplies 100 mg of elemental magnesium. Magnesium aspartate and citrate are both excellent choices for everyone needing supplemental magnesium. Daily Magnesium Aspartate is available in bottles of 150 capsules. (MS, SD)

Magnesium Citrate:

Magnesium citrate is a neutral salt of citric acid, an intermediate in the "Krebs Cycle". This is another form of magnesium that is well absorbed and that works well for everyone. There is 100 mg of elemental magnesium per capsule. Daily Magnesium Citrate is available in bottles of 150 capsules. (MS, SD)

Manganese:

Daily manganese citrate contains 5 mgs per tablet. Daily Manganese is available in bottles of 100 tablets.

Mincol:

Colloidal size particles extracted from soft rock phosphate, from fossil deposits of ancient bones. This is a source of calcium and other minerals in a phosphatic colloidal form, and is also a rich source of the phosphate anion. Three capsules supply 324 mg of elemental calcium. Daily Min-Col is available in bottles of 100 and 250 capsules (MS)

Potassium Aspartate:

A potassium salt of the amino acid, aspartic acid, that has a neutral reaction in the body and that is a well absorbed form of potassium supplying 99 mg of elemental potassium from 450mg of potassium aspartate per capsule. Potassium aspartate and citrate are both excellent choices for everyone needing supplemental potassium. Daily Potassium Aspartate is available in bottles of 150 capsules. (MS, RB)

Potassium Citrate:

A potassium salt of citric acid that supply's 99 mg of elemental potassium from 275 mg of potassium citrate per capsule. This product is a well absorbed form of potassium. Daily Potassium Citrate is available in bottles of 150 capsules. (MS, RB)

Selenium:

Each tablet contains 100 mcg of selenium as an amino acid chelate. Each tablet is slotted so it can be easily broken in half for a 50 mcg dose. Daily Selenium is available in bottles of 60 tablets. (C, CS)

Tri-Min:

Tri-Min is a combination of three essential trace elements. Each tablet supplies: zinc (15 mg as amino acid chelate), manganese (10 mg as amino acid chelate), and selenium (50 mcg organically bound to yeast). Daily Tri-Min is available in bottles of 100 capsules. (C, dicalcium phosphate)

Zinc:

Each tablet contains 30 mg of zinc as an amino acid chelate. Each tablet is slotted so it can be easily broken in half for a 15 mg dose. Daily Zinc is available in bottles of 60 tablets. (C, CS)

Product Availability: The above products are available by contacting Guardian Products, 866.Test.4ph (837.8474)
