

# RESISTANCE

## What you resist – persists

Resistance is a natural law, which impels growth or “becoming” through the law of experience. In the classrooms of life, we would not have the opportunity to learn the lessons which assist us to advance without resistance.

Resistance, or natural stress, becomes dis-stress when we feel we are out of control with no power to overcome the resistance. When you stop making the effort to overcome resistance, you become imbalanced. Aging, degeneration and dis-ease are the result of allowing the so-called dragons to be winners!

Resistance between alkaline and acid helps keep us alive and healthy.

Resistance is created when opposites come together creating a response.

Increased resistance, more than you can hold a balance against, creates conflict energy, which creates a TRAUMA!

Conflict energy is produced when the “real you” is struggling to get through the resistance.

Light travels as fast as it does because there is very little resistance to slow it down. The only thing we know of that travels faster than light are thoughts.

“Think Light Thoughts and Arrive where you want to be that much faster.”

We are committed to providing you with the best resources and information necessary to live a long and healthy life. Begin living a life free of degenerative disease, free of chronic pain, and free of prescription drugs. Outstanding mental function, emotional health, physical stamina and optimism can be yours. Perfect Health is just a phone call away.
